ESP12E/F ESP8266 Adapter Board

Use this extension board to make the ESP12E/F breadboard friendly. All pins are easily laid out with 0.1" spacing for standard 0.1" header connector. This extension board is populated with 3.3V~500mA voltage regulator so that it can be directly power by 5V systems voltage supply.

SKU: [ASS-1032](#)

Brief Specification:

- ESP-12 / ESP-12E / ESP-12F compatible.
- On board 3.3V voltage regulator with 500mA current rating.
- 2x 8pin Male Headers included.
- 10k pull up resistor on CHPD for chip enable
- 10k pull down resistor on GPIO2

Application Example:
