900M-T-SI Black King Solder Tip – Bended Needle Type

This type has a thin bended conical end best suited for drag soldering and correcting bridging. It is the best for soldering micro components such as 0603, etc. and for repairing high-density-mounting P.W.Bs. such as in cellular phones, etc.

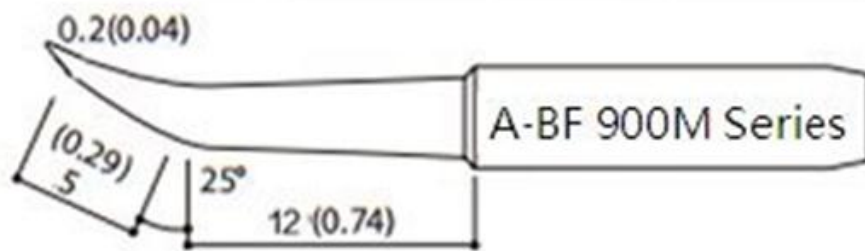

SKU: [ASS-1054](#)

Brief Specification:

- Lead Free 900M Series soldering tip.
- Part No: 900M-T-SI.
- Tip Shape: Bended Needle Type.
- For use with 936 soldering iron
- Features a smaller soldering iron tip size and split design to reduce accessory expense

Mechanical Dimension:

Unit: mm
