

Rain Drop Sensor Module

Easily detect rain with this high sensitivity sensor module. The large plate simply needs a drop of water to activate the sensor board output. The more water there is on the plate, the less the resistance. The Sensitivity (the amount of rain drop) is adjustable with on board potentiometer.

SKU: [SSR1031](#)

Brief Data:

- Operating Voltage: 3.3~5Vdc.
- Sensitivity Adjustment: On board Potential Meter.
- Output:
 - Digital (D0) – TTL switching signal output.
 - Analog (A0) – Analog output signal.
- Raindrop Sensor Board Area: 40 x 50 mm. Double sided FR4.
- Sensor Dimensions: 31x14 mm.
- Fixing Screw Hole: 4x M3.
- On board LED sensor status indicator.
- On board LM393 comparator for high sensitivity.

Mechanical Dimension:

Unit: mm

The Face behind our product quality...

In a world of constant change and continuous technological development, a new or replacement product is never far away – and they all need to be tested.

Many vendors simply import and sell without checks and this cannot be the ultimate interests of anyone, particularly the customer. Every part sell on Handsotec is fully tested. So when buying from Handsontec products range, you can be confident you're getting outstanding quality and value.

We keep adding the new parts so that you can get rolling on your next project.
